

# The Easy Way to Make Memorable & **Ultra Secure** Passwords

## Don't do this

Impossible to Remember

Practically forced to write it down

Not so Secure!

ThGk&4

6 character password  
only 3 minutes to crack!

9#2K&jbT

8 character password  
just 3 days to crack!

5hGwX&\$zTY

10 character password  
344 days to crack (better)

## Try this instead

Easy to Remember

Ultra Secure

3 Red Balls!

Cat-Fly-2-Castle

Give \$\$\$ to my Charity ME

12 character passphrase  
4 million years to crack

18 character passphrase  
12 trillion years to crack

25 character passphrase  
18 nonillion years to crack

DO make a passphrase that is unique and special to you (that you're sure to remember)

DON'T just use a famous quote, saying, or catchphrase (because these are still easy to guess)

DO find a creative way to use numbers, capitals, and special characters for extra security

Try out your new password at <http://howsecureismypassword.net> (also our source for these numbers)
